		Jyoti Nagpaul	1743				
Period fo	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status

#### **DETAILED ACTION**

### Claim Interpretation

With respect to Claim 1, lines 10-14, the applicant recites "in which a resilient body engaging portion 51 holding the resilient body 37 on the mutually facing plane of the substrate". It is unclear whether the applicant is claiming the "holding member" or the "body" as being resilient. It seems as the applicant is claiming the body to be resilient as well as the holding member.

## Claim Objections

The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1,3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chow.

Application/Control Number: 10/081,580

Art Unit: 1743

3. Chow discloses a microfluidic device. The microfluidic device includes a substrate holding member (206) in which at least one or more substrate holding portions holding the substrate on the upper surface is provided. A resilient holding member that is turnably supported (210) so as to cover the upper surface of the substrate holding member at one end portion of the substrate holding member, and in which a resilient body engaging portion holding the resilient body on the mutually facing plane of the substrate holding member is provided so as to face the substrate holding portion, and at the same time openings are provided so as to be coincident with the number of the holes of the held resilient body. Chow further discloses an opening and closing member that is movably supported on the upper surface of the resilient holding member and opens and closes the openings. (See Figure 6)

- 4. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Mahe.
- 5. Mahe discloses a test tube holder. Mahe a resilient body holding member (10) are made into slits that are continuous with respect to the holes of the resilient body. (See Figure 1, Claims 3 and 14)

# Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 3

Application/Control Number: 10/081,580 Page 4

Art Unit: 1743

7. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

2. Ascertaining the differences between the prior art and the claims at issue.

3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

- 8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 9. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asada.
- 10. Chow fails to disclose the resilient body is made of a silicone rubber plate.

  However, Asada discloses a electromagnetic actuator which comprises of a silicone base (220). (Col. 5, line 65-67) Thus it would have been obvious to one having ordinary skill in the art to modify the device of Chow such that the protein chip holding tool is made of a silicone rubber plate in order to easily secure the protein chip in the plate.

Application/Control Number: 10/081,580

Art Unit: 1743

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Nagpaul whose telephone number is 571-272-1273. The examiner can normally be reached on Monday thru Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
